This publication outlines the *Virginia Statewide Fire Prevention Code* (i.e., Fire Prevention Code or SFPC) requirements for operational permits in Fairfax County and the towns of Clifton, Herndon, and Vienna. Section 108 of the SFPC requires operational permits for a variety of regulated materials, processes, and occupancies. Operational permits issued by the Fairfax County Office of the Fire Marshal are known as Fire Prevention Code Permits (FPCP). FPCP requirements originate from Table 107.2 of the Fire Prevention Code (as amended by Fairfax County), and are provided in this guideline for your convenience and ease of reference. Permits are valid for one year unless noted otherwise and must be renewed annually.
